PROFILE

Frontend Developer with hands-on experience in HTML, CSS, and JavaScript, combined with 2 years of customer support background at One Play. This blend of technical and client-facing skills gives me a unique perspective — I build clean, responsive interfaces while understanding exactly what users need.

I recently launched **CSS Library Pro**, a premium collection of 25+ UI components with live preview and one-click copy, available on Gumroad. Currently seeking frontend development opportunities — both full-time and freelance — where I can grow and contribute.

EXPERIENCE

- Customer Support Assistant** 2024 — Present
- One Play**
- Resolved technical inquiries and provided clear, step-by-step solutions to customers
 - Developed strong communication skills by explaining technical concepts to non-technical users
 - Managed multiple customer cases simultaneously under pressure
 - Collaborated with internal teams to troubleshoot and escalate complex issues
 - Maintained high customer satisfaction ratings through efficient problem-solving

FEATURED PROJECT

CSS Library Pro

devvibe2.gumroad.com/l/tuxdag →

A premium collection of 25+ handcrafted UI components with live preview and one-click copy-to-clipboard. Built with pure HTML, CSS, and JavaScript — zero dependencies. Includes buttons, cards, forms, navigation, alerts, pricing tables, hero sections, and more across 8 categories.
